Backroom Bargaining: Racketeering and Rebellion in New York City's Labor Unions

By: Jane Latour

University of Illinois Press, 2026

My first contact with labor reformers in New York City was nearly 50 years ago. Like many rank-and-file dissidents, before and since, these critics of union corruption were prophets without honor in their own local.

Teamsters Local 282 was, at the time, one of the most mobbed-up affiliates of a national union then rightly notorious for its organized crime ties. Its members drove trucks full of cement or other building materials to local construction sites, while 282 leaders like Bobby Sasso extorted bribes to insure labor peace or allow non-union operations.

Sasso held various union jobs for 25 years but his real boss was not the drivers, whose dues paid his salary. It was a wise guy from Howard Beach in Queens named John Gotti. As head the Gambino family, Gotti siphoned hundreds of thousands of dollars from the local, until a hitman responsible for 19 murders - Salvatore ("Sammy the Bull") Gravano - became an FBI informant and helped put "The Teflon Don" behind bars.

Rank-and-filers critical of employer shake-downs, no-show jobs for mob associates, and other crooked schemes in Local 282 displayed enormous, almost reckless, courage. In the 1970s and 80s, they called their dissident caucus Fear of Reprisal Ends (FORE)—and suffered retaliation in multiple forms for organizing it. FORE was affiliated with the Professional Drivers Council (PROD), a Ralph Nader inspired advocacy group that I worked for, at the time, and helped merge with Teamsters for a Democratic Union in 1979.

Most of the 5,000 "ready mix" drivers in 282 steered clear of FORE, because its key activists were so regularly threatened, harassed, or blacklisted.

Nevertheless, a FORE candidate who ran for local union president in 1978 got 42 percent of the vote in a low turn-out election—before being fired, along with his running-mate. The 282 president re-elected that year was John Cody, who was convicted of labor racketeering just a few years later by a U.S. Attorney who described the local as “a candy store for the mob.”

Nevertheless, some deeply cynical 282 members continued to view FORE as a bunch of “Boy Scouts.” Or, worse yet, “Teamster enemies” working for “the feds,” as local officials like Cody and Sasso always claimed—until Sammy the Bull actually took that route to the federal witness protection program in 1991. The testimony that nailed John Gotti included this proud boast by his former under-boss:

“I had control of the whole thing. The president [Sasso], the vice-president, the secretary/treasurer, delegates, foreman. If I wanted a foreman in there, I’d tell Bobby, ‘Put this guy to work.’”

In the last half century, the culture of blue-collar unionism in the Big Apple has become far less Mafia-influenced, due to successful union democracy and reform struggles. In the 1990s, a longtime leader of Teamsters Local 804 in Queens—Ron Carey—became International union president, with the backing of TDU and its chapters around the country. Under Carey’s leadership, the Teamsters conducted a successful nationwide strike at United Parcel Service, the union’s largest employer, in 1997. Local 804 continues to be a model Teamster local today, by nurturing rank-file-activists like Anthony Rosario, a UPS veteran named “2025 Labor Organizer of the Year” by *In These Times*, because of his exemplary work with non-union employees of Amazon.

The changes made possible when IBT rank-and-filers, like Rosario, won the right to vote on their top officers became an inspiration for union reformers elsewhere. Just three years ago, UAW members—long saddled with a corrupt and undemocratic Administration Caucus—used referendum voting to put opposition candidates, like Shawn Fain, in office, after decades of tightly controlled convention elections, which favored the incumbents.

However, in old fashioned business unions—still run from the top down, nationally or locally—institutional loyalty runs deep. Where grifters and goons still hold power in New York City, they’re usually savvy enough to deflect any criticism of themselves by claiming that internal dissent threatens the very existence of trade unionism itself. In the Trump era, there’s even more weary cynicism for incumbents to exploit—about the inevitability of corruption in politics, big business, and organized labor.

This is the local labor terrain explored by the late Jane Latour, a much-beloved labor organizer, journalist, and advocate for women in the building trades. Her previous book, *Sisters Inside the Brotherhoods*, was an outgrowth of her work for the Women’s Project of the Brooklyn-based Association for Union Democracy (AUD). Her new volume again utilizes oral history interviews, this time with predominantly male building service employees, painters, carpenters, utility workers, maritime union members, and Teamsters who joined FORE to fight labor-management corruption in the construction industry.

Backroom Bargaining also profiles two of the most important late 20th century helpers of union dissidents, both past contributors to *New Politics*. They were Herman Benson, the socialist founder and longtime director of the AUD, and Burton Hall, a Yale Law School graduate and former public defender who helped his labor clients utilize the “membership bill of rights” created by the Landrum-Griffin Act of 1959. As Latour recounts, it was Benson “who built a network of lawyers, scholars, and public intellectuals willing to aid the cause of often ostracized union rebels” and Hall who waged “tenacious court battles to force the union establishment to respect their hard-to-enforce rights.”

One of the most interesting chapters in the book deals with the limitations of legal remedies—as necessary as their pursuit has been in countless union democracy and reform struggles over the last 65 years. In a chapter entitled, “We’re from the Government and We’re Here to Help You,” the author recounts the debates that have engaged several generations of union members and officials about varying forms of “government interference” in union affairs.

These have ranged from U.S. Department of Labor investigations leading to re-runs of improperly conducted union elections to longer lasting judicial oversight resulting from Justice Department lawsuits filed under the Racketeer Influenced and Corrupt Organizations (RICO) Act. To settle this debate, sort of, Latour quotes Ken Paff, a co-founder of TDU still involved with the group fifty years later: “We don’t rely on the government or the law. We use the government and the laws, and we rely on the rank-and-file.”

All of the workers in Latour’s book, who experienced “the gap between the ideal and the disheartening reality of the U.S. labor movement” were dead or long retired before *Labor Notes* developed one of its most popular current training sessions. That workshop addresses a still relevant question: “What to do when Your Union Breaks Your Heart?”

According to former teachers’ union organizer and *Labor Notes* Board member Ellen David-Friedman, the target audience is workers “wondering how it is that their union, an organization that exists to make work life better, is in the hands of people who are not doing that?” As *Backroom Bargaining* reminds us, the struggle to hold union leaders accountable—and replace them, when necessary, with workers more committed to union democracy and reform—can be difficult and frustrating. But rarely as risky as challenging the mob associates who bullied and betrayed the dues-paying members of Teamsters Local 282 long ago.

Fortunately, Labor Notes, TDU, and the AUD all remain on duty as essential allies of such efforts. And readers of Jane Latour’s posthumously published book about labor “racketeering and rebellion,” in the past, will find it to be a useful “road map for the fight against autocracy and corruption” anywhere that either exists in our country today.
